Subject: Briefing by PLP - Fisheries, hydrology and geochemistry

In light of the difficulty in scheduling a briefing by PLP, they agreed to provide information on specific topics as a subset of the environmental baseline studies. We will not be receiving any data at this time. These will be presentations by contractors. As you can see these will be short presentations. With that in mind we will coordinate our questions so as not to have a free-for-all that takes up all the time. Jeff and Rick will be developing a system to coordinate questions. We may be using the system on go-to-meeting to pass questions to a single spokes person. That information will be forth coming.
